- Coil Selection Program Request

Types

Tube Bundles / Heat Exchangers

“U” Tubes Bundles

Straight Tube “Floating” Tube Sheet Bundles

Retube Existing Tube Sheet

Tank Heater Bundles

Shell & Tube Heat Exchangers —

Design and Manufacture

Materials

Standard: 3/4" OD Copper Tubes and Steel Tube Sheet
(Between the Bolts or Full Face with Bolts holes)

*We can match your existing Bundle
to include dimensions, materials
and performance.*

Options

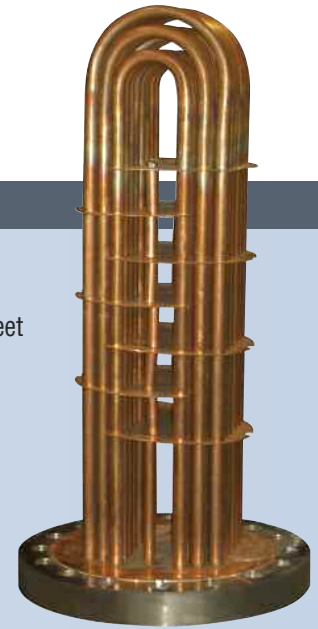

Tube sheet: Copper Lined, Stainless Steel
and Brass

Tubes: 90:10 Cupro Nickel, Stainless Steel,
Admiralty Brass

Double Wall Available

(Copper or Cupro-Nickel Only)

ASME Stamp

Tube Bundle

Self Contained Ceiling AC “T-Bar Units”

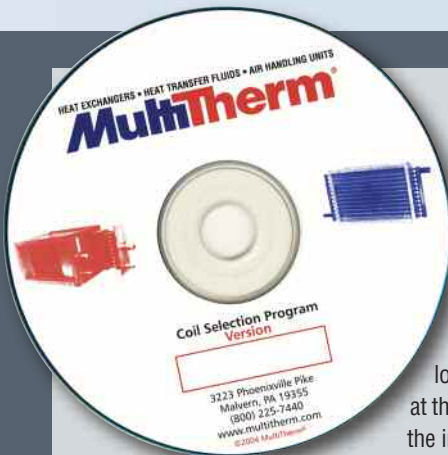

Air-Cooled, Chilled Water and DX Units
fits right into a standard 2' x 4'
suspended ceiling panel,
with no floor space
needed.

Sizes

1, 1.5 & 2 Ton with
various options to meet
your specific needs.
(Many units are in stock)

T-Bar Unit

FREE State-of-the-Art Coil Selection Program

MultiTherm LLC has developed a state of the art HVAC coil selection program. The “Windows” based coil selection program calculates performance on existing coils as well as makes selections on the most efficient coils for your job. It offers the lowest pressure drop along with the lowest cost to fill your job requirements quickly and at the lowest possible cost. This program is the best in the industry and it is absolutely free.

MultiTherm provides a myriad of heavy-duty designs for HVAC and process heating and cooling applications. Applications include high-pressure steam, thermal liquid, high pressure and untreated water, DX cooling and PreHeat/PreCool coils. Materials include copper, cupro-nickel, brass, carbon steel, stainless steel and we have all applicable ASME standards included.
